

AGILITE

Developing the digital and entrepreneurial competences of VET trainers to support agile entrepreneurship training

AN OVERVIEW OF OUR PATH

Since the first Newsletter, due to our willingness and know-how, step by step, our project is beginning to take shape. As a team, with great enthusiasm, we dedicate our time to look at every detail carefully in order to develop the most innovative learning practices.

Currently, the partner consortium is preparing the interim report of the AGILITE project.

We are happy to finalize the IO1 - DigCompEdu EduZines for building the digital competences for VET tutors. It addresses each of the following competences: professional engagement, digital resources, teaching and learning, assessment, empowering learners, as well as facilitating learners' digital competence.

Thus, a toolkit of 6 EduZines has been developed and now is in the testing stage.

THE FLOWERING OF
AGILITE PROJECT

With the support of the
Erasmus+ Programme
of the European Union

Second Intellectual Output - AGILITE EntreComp EduZines for building an entrepreneurial spirit within the VET sector - is in its active development phase now. It targets one for each of the 5 competencies identified in the "Ideas & Opportunities", namely: spotting opportunities, creativity, vision, valuing ideas, ethical and sustainable thinking. These five competencies have been specifically chosen as they focus on the building of solution focused knowledge, skills and attitudes that are a prerequisite for developing an entrepreneurial spirit in VET. A toolkit of 5 EduZines is expected to be developed by the set deadline.

Moreover, Portuguese partners from ISQ, Irish FIP, Spanish Postal3 and AKMI from Greece work on the learning content of the Output 3.

It consists of two EduZines that introduce the principles of the circular economy which is one of the key foundation stones of the European Green Deal and aimed to improve performance of the VET sector.

As well, we continue to perform the dissemination part of our program to provide you with accurate information about AGILITE project.

We are looking forward to having a chance to conduct a face-to-face meeting, but meanwhile, we continue working online as the new reality brought to us new challenges.
