

Community of Practice

To support the professional development of the Vocational Education Community across Europe, the AGILITE partners are facilitating an online community of practice to share ideas, exchange knowledge and discuss the changes that are impacting of vocational education provision across Europe – the dual transition our starting point.

AGILITE

Unlock the power
of vocational education
with innovative digital
learning solutions

AGILITE builds the digital competencies and the entrepreneurial spirit, as well as an understanding of the principles of circularity, within the VET sector to ensure that the climate targets of “*The European Green Deal*” are achieved.

A combination of interactive infographics and EduZines (educational magazines) have been designed for remote and on-the-spot learning for vocational education professionals as a demonstration of educational innovation in today’s digital era.

By supporting the continuous professional development of VET educators, AGILITE presents the following three EU Frameworks outlining their importance and relevance to VET teaching practice. Micro-learning resources presented as EduZines address:

- DigCompEdu
- EntreComp
- EU Green Deal

DigCompEdu

The European Framework for the Digital Competence of Educators (DigCompEdu) describes what it means for educators to be digitally competent. It provides a reference point to support the development of educator-specific digital competences in Europe. To support the delivery of DigCompEdu we have created EduZines on the topics of:

- Professional Development
- Digital Resources
- Teaching and Learning
- Assessment
- Empowering Learners
- Facilitating learners’ digital competence

EntreComp

EntreComp is the European reference framework to support a shared, comprehensive understanding of entrepreneurship, identifying the core knowledge, skills, and attitudes needed to master this competence. To support the delivery of EntreComp we have created EduZines on the topics of:

- Spotting Opportunities
- Creativity
- Vision
- Valuing ideas
- Ethical and Sustainable Thinking

EU Green Deal

Through our EduZines we introduce the principles of circularity that underpin the EU Green Deal. Topics addressed include:

- Design out waste
- Focus on Performance
- Think Local
- Think in systems
- Think in cascades
- Waste is Food
- Use Renewables
- Build resilience through diversity

What are EduZines?

EduZines are educational magazines that are designed for smartphone learning comprising articles, videos, self-reflection activities and quizzes.

AGILITE MOOC

All of the CPD resources of the AGILITE project can be accessed by visiting our MOOC (*massive open online course*).
